

Dear comrades,

The League of Young Communists USA (LYC) recognizes the failure of the global capitalist system in light of the pandemic and the awakening revolutionary consciousness the world over. The time in lockdown has led many to discover and act upon the answers carved out by workers and youth from years past . As in the words of Luxemburg: "Those who do not move, do not notice their chains". The ruling class and its general staff are determined to drive those moving, the exploited and oppressed peoples, into submission when they take up the torch of liberation.

Using the pandemic as an excuse to further state repression and impose stricter bans on those struggling for a brighter future, the forces of modern Hitlerism shamelessly affirm their past role in the killing of the leaders of the masses. It is no surprise that the dogs of capital follow in the footsteps of the Freikorps to violently silence the voices of the German youth.

The LYC stands in solidarity with the Free German Youth and its role in 85 years of struggle against war and fascism.

Long live Luxemburg and Liebknecht!

May the youth of Germany continue the struggle for socialism.
